OBJECTIVE

Motivated and enthusiastic graduate seeking an entry-level position where I can apply my technical knowledge, problem-solving skills and communication abilities while contributing to organizational growth and continuously enhancing my professional skills.

ACADEMIC QUALIFICATION

B.E Computer Science and Engineering, Dr. N.G.P. Institute of Technology - 2027

HSC, AGN School a Matric and Higher Secondary Institution - 2023

SSLC, AGN School a matric and Higher Secondary Institution - 2021

CGPA: 7.96

PROJECTS

HAND TALK AI

- Hand Talk AI uses computer vision, deep learning and image processing to detect and interpret hand gestures through cameras or sensors.
- It enables real-time recognition of sign language and converts it into text or speech.
- The system helps improve communication for people with hearing and speech impairments.

FARMER CHATBOT

- Farmer Chatbot to provide farmers with quick and reliable agricultural assistance through an interactive chat interface.

- The chatbot helps users by answering queries related to crop cultivation, fertilizer usage, pest and disease management, weather updates, and modern farming practices.
- It uses Natural Language Processing (NLP) techniques to understand user questions and provide relevant responses.

LIBRARY MANAGEMENT SYSTEM

- Library Management System to automate and simplify the management of library operations.
- The system enables efficient handling of book records, student records, book issuance, returns and fine calculations.
- It provides a user-friendly interface for librarians to manage the library databases and track the availability of books in real time.

HOSPITAL MANAGEMENT SYSTEM

- Hospital Management System to streamline and automate various hospital operations, including patient registration, appointment scheduling, doctor management, medical records maintenance and billing process.
- It improves data accessibility and reduces manual errors.
- It helps reduce administrative workload, improves data accuracy and enhances communication between patients, doctors and hospital staff.

HOTEL ROOM BOOKING

- The system maintains a centralized databases to store customer information, booking details, room types and payment records.
- It allows easy management of check-in and check-out process.
- It improves booking efficiency, reduces errors and enhances overall customer experiences.

INTERNSHIP

- Completed 15 days “**Web Development**” internship at Appin Technology, Coimbatore - 2024

TECHNICAL QUALIFICATION

- **PROGRAMMING LANGUAGES:** Python, Java
- **WEB:** HTML, CSS, JavaScript
- **SOFT SKILLS:** Problem-solving, logical thinking, adaptability

COCURRICULAR ACTIVITIES

- Attended a workshop on “**Front-end Development**” at Rathinam Institute of Technology, gaining knowledge in modern web technologies - 2024
- Presented a paper on “**Automatic Sign Detection**” at Sri Ramakrishna Engineering College. Enhanced understanding of front-end concepts and emerging technologies through these activities - 2024
- Participate a Project Expo on “Hand Talk AI” in Dr. N.G.P Institute of technology - 2026

CERTIFICATE

- NPTEL - Cloud Computing - 60% Elite
- NPTEL - Introduction to Internet of Things – 61% Elite
- MongoDB Basics – ICT Academy Learnathon

LANGUAGE KNOWN

- Tamil
- English
